

# BURG®

## Security in no time.

Solutions for window fittings

**Turn- and push cylinders from BURG** are developed in such a way that they do not detract from the appearance of the handle and window. They are characterised by a high-quality locking feel and maximum durability. Thanks to their small dimensions and the simple insertion process, installation is child's play.

Cylinders for window and door fittings have been manufactured from high-strength zinc here in the Ruhr region for over 30 years. BURG offers the hardware industry a strong standard range for the most common dimensions - available for immediate order. We are also known for customized solutions. Whether mechatronic or mechanical: at BURG you get development, production and assembly from one source.

Numerous satisfied customers trust our hardware solutions:

**HOPPE**   
Der gute Griff.

**BURG  
WÄCHTER**

**FKS**

 **FSB**

**SIEGENIA**  
brings spaces to life

# Available configurations

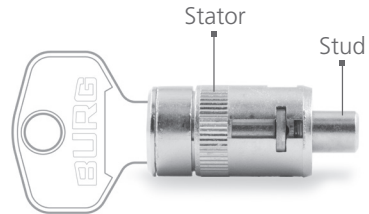

## Rotating cylinder

stator lengths	24.5, 25.3, 27, 27.5
diameter	13, 15
stud lengths*	14, 18, 21, 23, 31, 45.3
stud diameter	5, 6, 7, 8
electroplating	Nickel
closing angle	90°, 170°, 180°, 220°

## Push cylinder

stator lengths	27, 28, 30, 31, 32
diameter	13, 15
stud lengths*	14, 21, 23, 29, 40.3
stud diameter	4.5, 5, 6, 7
electroplating	Nickel
*fragmentary	dimensions in millimetres

? Can't find what you're looking for?  
Other configurations are also available on request!

## Customized solutions

We also develop customized mechatronic or mechanical solutions according to your wishes. Whether you already have a concrete idea or are starting from scratch, our team of experts will advise and guide you through to the finished product.

Mechatronic:  
Window handle

Mechanical:  
Door and window lock
